EDUCATION

SSC

Thanahat A U pilot High School
2017 - 2018

HSC

Chilmari Govt. College
2019 - 2021

SKILLS

- **Android** (Java)
- **Android/iOS** (React Native)
- **JavaFX or Electron JS** (Windows, Linux, Mac)
- **Web Design** (HTML, CSS, JS)
- **Web Design** (React JS)
- **Databases** (MySQL, SQLite, Firebase)
- **API** (PHP, Express JS, Django, Node JS, Google App Script)
- **Server** (Apache2, NGINX, RTMP, VOD)
- **Hardware** (Linux, Mikrotik, Windows , Arduino)

WORK EXPERIENCE

Android Developer 2019 - 2021

BNB Tech Pvt. Ltd. | Rajsthan, India

It was a great journey as an Android developer, and I did a few projects within this company including - Gamboll - Tiktak alternative app, Enactor - Live Multiplayer Guessing game, School management system and more.

Android, Web, Server Management

Fast Pay Internet | Kurigram, Bangladesh 2021 - 2022

My goal was to simplify the process of management for this ISP (Internet Service Provider). I worked on Android app for Network Testing tool, Mikrotik active/inactive user management, Monthly automated User Report. Web (HTML, CSS, Js, PHP, Node.js, Mikrotik API) - was a complex web UI to manage Mikrotik hardware via RouterOS api using Node.js , User Report and statistic via Apache2, PHP/MySQL Api , Live Streaming + VOD Live TV server using Nginx - RTMP - Ffmpeg - Hls, Linux System to host everything and use as local server.

I am currently working as [Web/Android,iOS/Computer Software Developer](#) at [Fiverr, Upwork and Freelancer](#)

Have a LOOK ! if you are looking for any stacks of experience

Live Solution

- **Real Time Communication**
 - WebRTC on Android/iOS, Computer Software or Website for Video/Audio Call.
 - Socket.io on any platform for Realtime Chat/Data transfer/Game
 - Firebase on any platform for Realtime communication solution.
 -
- **Live Stream** (RTMP, VOD Live streaming with NGINX and playback via Web, Android/iOS or Computer software)

MERN Stack

Well it's **MERN** but **M** for **MySQL** instead of **MongoDB** .

MERN stack is something which include MongoDB whereas I prefer using MySQL as database. The reason is, my past freelance job experience says, there are lot of mid range Hosting plan favorite to client's that include Nodejs but don't have MongoDB included. So, MySQL is a great choice for all level Hosting. But I am only a few days away if **MongoDB** is required.

Full Stack

I am available as Full Stack Software developer for Cross Platform Development using whatever fit the need.

Including Website, Android, iOS, Linux, Mac, Windows or even custom hardware like Arduino.

best fit is **Node JS**. Reason:

- **React JS** : for Website design which works in almost every platform.
- **React Native** : for Android/iOS.
- **Electron** : for Windows, Linux and Mac where React JS is a child library.
